

## F350 DEVICE WITH IMMINENT-EMPTY-MAGAZINE SENSOR

F350 Counter S Model

Purchase code: F35-E00-G04

Clamp with sensor

This device is a useful tool that allows you to notify the operator when the magazine is about to end. Height adjustment is done via a sturdy clamp with lever.

**How it works:** When the products quantity drops below the set level, a probing lever activates a sensor and an output signal to which a luminous acoustic device can be connected, (not included) or it can activate our Autoloader automatic loading device (not included). Setting and activation is done via the Touch-screen panel

**What it includes:** A sturdy anodized aluminum clamp, with stainless steel probing lever and sensor, a connection cable with M8 connector for the sensor, an output cable with M12 connector, programming software with output timer and activation button.

**How it is installed** The installation is very simple, the clamp is mounted, the 2 input and output connectors are connected, and the simple panel activation and timing settings are made. Applicable: on Counter S, Vision and Marker models.
